Dear Property-Owners: The ice is starting to buckle on Wasa Lake. A sure sign of spring?

DAMAGED WATER TESTING WELL

On February 17, a resident reported that the water well, in which the data logger is installed, was severely damaged. The well, located at the north end of Ponderosa Road, was struck with great force from the lake-side foreshore, bent over at a considerable angle, and will need to be replaced. Please contact admin@wasalake.ca if you have any information about this event.
