

Taxes

We have continued to work with BC Assessment and Land Titles with an aim of 100% accuracy for the tax roles. We believe we are very close to this now.

This information sharing has allowed correction of addresses, names on titles as well as verification of the boundaries of the WLLID for all parties.

At this time only 2 properties remain with taxes over 2 years overdue whereas last year there was 18.

This has allowed us to increase our reserve fund that the Gov. mandates for maintaining capital works.(Flood mitigation gates).

It has also allowed us this year to lower the taxes from \$60-\$50 per year as well as the interest rate on overdue taxes from 10%-6%.

Electronic Fund Transfer for tax payments has experienced a technical setback with the bank but we hope to have this remedied shortly and will keep you posted.

Electronic monitoring of Lake and River levels is an area we continue to investigate. This may allow for more accuracy with regards to Flood and Drought levels and data for Septic installation levels.
